

BERGEN TECH TETERBORO HACKATHON 2026

The 2026 Bergen Tech Hackathon was our best year yet!

We want to thank you — our sponsors, donors, speakers, judges, mentors, teachers and families — for making it possible. Not one piece of this event happens without you.

This year the event grew again, with **130 high school students** from both the Teterboro and Paramus campuses registering to compete. Students formed **39 teams** for a 12-hour sprint under our "Build with AI" theme — going from a blank screen to a working demo in a single day. From idea generation, to building, to final presentations in front of industry judges, the creativity and ambition on display was genuinely extraordinary.

We awarded **\$4,500 in prizes across 13 categories**, recognizing everything from best use of AI and most technically ambitious build to social impact, design, and rookie team of the year.

A few example projects:

- A mobile app that helps the visually impaired navigate the real world
- An AI recipe builder to improve nutrition and variety in refugee camps
- A mapping system that finds safe walking routes through a neighborhood
- A DMV RPG that turns passing your driver's test into a game
- A study app that grades you on whether you can teach the material to an AI
- A financial budgeting app for teens, making it easy to save toward real goals
- A water-usage estimator for your interactions with AI chatbots
- An app to help you actually learn CSS, not just copy it
- A virtual drum kit you can play from your keyboard
- and much more!

BY THE NUMBERS

- **130** high school students
- **39** teams
- **13** prize categories
- **\$4,500** in prizes
- **15+** sponsors & donors
- **~30** volunteers
- **4** industry speakers & judges
- **12** hours, 1 unforgettable day
